1. The disclosure is objected to because of the following informalities: Applicant states that he has amended the specification and that a substitute page 17 is included, however the examiner can not find a copy of the substitute page 17 and it is requested that applicant submit another copy in response to this action.

Appropriate correction is required.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,500,112. Although the conflicting claims are not identical, they are not patentably distinct from each other because they both claim a device for enhancing or enlarging tissue having a vessel or dome to surround the tissue, a source of vacuum and a flexible mass or rim around the open end of the device to seal the device to the body and to diffuse or to distract the force acting on the adjacent tissue so as not to damage the surrounding tissue. They both claim the same device only using slightly different terminology, i.e. vessel or dome, rim or flexible mass.
